Individual orthopedic solutions

Features of the solutions:

- lasts can be used to produce orthopedic shoes with the possibility to remove a reinforced insert and adjust if necessary;
- it is possible to produce half-shoes, keeping the supports (even in the case of half-shoes; after covering some parts with leather).

Materials:

- Nora padding;
- Leather lining – chrome and metal free;
- PH neutral;
- Renoflex reinforcement;
- Smoothing and wider from Multifom.

	24	25	26	28	29,5

Lenght tolerance +/- 2 mm

Not for sale in Belgium, Netherlands, Luxemburg

An electronic chip for smart shoes

What is it?

- An electronic device between lining and upper leather with relevant information.
- Smart patient data protection and alternative for paper labels.

What is possible to enter?

- text information up to 130 symbols (tabs included);
- website address, with possibility to scan it and open in your phone;
- shoes service phone number with possibility to scan and open it directly in your phone;
- appointment dates for visit in clinic.

Benefits:

- possibility to change information;
- partial patient data protection;
- important information directly in shoes, reachable every time you need.

Interested? Contact your manager in AB „Ortopedijos technika“ and we could discuss price and possibility to produce free example.
